INDEPENDENT AUDITORS' REPORT

The Board of Directors and Stockholders
Bank SinoPac

We have audited the consolidated balance sheets of Bank SinoPac and subsidiaries as of December 31, 2003 and 2002, and the related consolidated statements of income, changes in stockholders' equity and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Bank's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the Rules Governing the Auditing and Certification of Financial Statements of Financial Institutions by Certified Public Accountants and auditing standards generally accepted in the Republic of China. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial positions of Bank SinoPac and subsidiaries as of December 31, 2003 and 2002, and the results of its operations and its cash flows for the years then ended, in conformity with Criteria Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the Republic of China.

January 29, 2004

Notice to Readers

The accompanying financial statements are intended only to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such financial statements are those generally accepted and applied in the Republic of China.

BANK SINOPAC AND SUBSIDIARIES

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2003 AND 2002
(In Thousands of New Taiwan Dollars, Unless Otherwise Stated)**

1. ORGANIZATION AND OPERATIONS

The Bank obtained government approval to incorporate on August 8, 1991, and started operations on January 28, 1992. The Bank is engaged in commercial banking, trust, and foreign exchange operations as prescribed by the Banking Law.

As of December 31, 2003 and 2002, the Bank had a total of 2,026 and 2,121 employees, respectively.

As of December 31, 2003, the Bank's operating units include Banking, Trust, International Division of the Head Office, an Offshore Banking Unit (OBU), 44 domestic branches, 2 overseas branches and 1 overseas representative office.

The operations of the Bank's Trust Department consist of: (1) planning, managing and operating of trust business; and (2) custody of non-discretionary trust fund in domestic and overseas securities and mutual funds. These operations are regulated under the Banking Law and Trust Law.

Under the Financial Holding Company Act, the Bank, National Securities Co., Ltd. (the "NSC", which was renamed as SinoPac Securities Corporation on June 9, 2002) and SinoPac Securities Co., Ltd. (the "SPS") established SinoPac Holdings (the "SPH"), a financial holding company as of May 9, 2002. The parties established the holding company to maximize the benefit of their combined capital, pool their business channel, fully harness the synergy of their diversified business operations and establish one of the most competitive organizations in the Pacific Rim. The Bank, the NSC and the SPS swapped issued shares with SPH at ratios of 1:1.0267130836, 1:1.0098971566 and 1:0.7968960296, respectively, which had been approved by the stockholders on November 19, 2001. Since May 9, 2002, the effective date of the shares swap, the Bank has become an unlisted wholly owned subsidiary of SPH which shares are traded on the Taiwan Stock Exchange (TSE).

SinoPac Securities Corporation (the "SinoPac Securities", formerly NSC) merged with SPS on July 22, 2002 with SinoPac Securities as the surviving entity after a decision reached by the board of directors of the two companies on May 9, 2002. Each share of common stock of SinoPac Securities was swapped for 1.2672884782 shares of common stock of SPS, resulting in 250,863,205 shares of common stock issued by SinoPac Securities.

On August 15, 1997, the Bank acquired Far East National Bank (FENB), through SinoPac Bancorp, by purchase of 100% of its shares. FENB was established in Los Angeles in 1974. It is a commercial bank engaged mainly in deposit taking and lending businesses. As of December 31, 2003, FENB has 15 branches in Los Angeles and San Francisco areas and 1 Beijing representative office. It also has 6 wholly-owned subsidiaries—Far East Capital Corporation, FENB Securities Inc., FENB Loan Corp., FENB Film Corp., FENB Service, Inc., and Film Service Management Corp.

As of December 31, 2003 and 2002, SinoPac Bancorp and FENB had a total of 373 and 339 employees, respectively.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Bank's consolidated financial statements were prepared in conformity with Criteria Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the Republic of China (ROC). In determining the allowance for credit losses, depreciation, pension, losses upon suspended lawsuit and provision for losses on guarantees, the Bank needs to estimate reasonable amounts. Since the estimates were usually judged and made under uncertain conditions, thus, the estimates may vary from the actual amounts. Since the operating cycle could not be reasonably identified in the banking industry, accounts included in the Bank's consolidated financial statements were not classified as current or non-current. Nevertheless, accounts were properly categorized according to the nature of each account, and sequenced by their liquidity. Please refer to Note 27 for maturity analysis of assets and liabilities. Significant accounting policies of the Bank are summarized below:

Consolidation

The consolidated financial statements include the accounts of the Bank and its subsidiary, SinoPac Bancorp, as consolidated with FENB. All significant inter-company transactions and balances have been eliminated for consolidation purpose.

The operating revenues and total assets of the other 3 subsidiaries—SinoPac Leasing Corporation, SinoPac Capital Limited and SinoPac Financial Consulting Co., Ltd.—are individually less than 10%, and are in aggregate less than 30%, of those of the Bank. Accordingly, their accounts were not included in consolidated financial statements.

Securities Purchased

Securities purchased include short-term bills, stocks, beneficiary certificates, treasury bills and bonds.

Short-term bills are stated at cost (which approximates market value), as well as treasury bills. Stocks, beneficiary certificates and bonds are stated at the lower of cost or market. Market prices are determined as follows: (a) listed stocks—average daily closing prices for the last month of the accounting period; (b) beneficiary certificates (open-end fund)—net asset values as of the balance sheet dates; and (c) over-the-counter stocks—average daily closing prices for the last month of the accounting period, published by GreTai Securities Market (the "OTC"); and (d) bonds—period-end reference prices published by the OTC.

Cost of securities sold is determined using the moving-average method, except that of short-term bills, which is determined by the specific identification method.

Under accounting principles generally accepted in the ROC, for applying the lower of cost or market method, the SPH's shares held by the Bank should be evaluated separately from the other listed and over-the-counter stocks.

Pursuant to the directive issued by the Ministry of Finance (the "MOF"), sales and purchases of bonds and short-term bills under agreements to repurchase or to resell are treated as outright sales or purchases. However, pursuant to the "Criteria Governing the Preparation of Financial Reports by Public Banks" effected since January 1, 2004, the repurchase/resell transactions will be treated as financing.

Nonperforming Loans

Under guidelines issued by the MOF, the balance of loans and other credits extended by the Bank and the related accrued interest thereon are classified as nonperforming when the loan is six months overdue. In addition, upon approval by the board of directors, those loans which are less than six months overdue will also be classified as nonperforming.

Allowance for Credit Losses and Provision for Losses on Guarantees

In determining the allowance for credit losses and provision for losses on guarantees, the Bank assesses the collectibility on the balances of loans, discounts and bills purchased, accounts, interest and other receivables, and nonperforming loans, as well as guarantees and acceptances as of the balance sheet dates.

Pursuant to “The Rules for Bank Asset Evaluation, Loss Reserve Provision, and Disposal of Overdue Loans and Bad Debts” (the “Rules”) issued by the MOF, the Bank evaluates credit losses on the basis of its borrowers’/clients’ financial positions, the Bank’s prior experiences, repayments for principal and interest by borrowers/clients, collateral provided, and estimated collectibility.

The Bank assesses losses on particular loans in accordance with the Rules stated above. The Rules provide that the minimum provision for credit losses should not be less than the aggregate of 50% of the doubtful credits and 100% of the unrecoverable credits.

Write-offs of loans falling under the MOF guidelines, upon approval by the board of directors, are offset against the recorded allowance for credit losses.

Long-term Equity Investments

Long-term equity investments are accounted for by the equity method if the Bank has significant influence over the investees. Under this method, investments are stated at cost plus (or minus) a proportionate share in net earnings (losses) or changes in net worth of the investees. On the acquisition date, any difference between the acquisition cost and the equity in the investee is amortized over 15 years. Long-term equity investments are accounted for by the cost method if the Bank does not have significant influence over the investees. Stock dividends result only in an increase in number of shares and are not recognized as investment income.

If an investee issues new shares and the Bank does not buy new shares in proportion to its equity in the investee, then the Bank’s equity in net assets of the investee will be changed. This difference will be used to adjust the additional paid-in capital and the long-term equity investment. If the carrying value of additional paid-in capital from long-term equity investment is not enough to be offset, then the difference will be debited to the retained earnings.

For listed and over-the-counter stocks accounted for by the cost method, when the aggregate market value is lower than the total carrying amount, an allowance for market value decline is provided and the unrealized loss is charged against stockholders’ equity. If a decline in the value of an unlisted stock investment is considered a permanent loss, the decline is charged to current income.

Cost of equity investments sold is determined by the weighted-average method.

For the listed stock investments reclassified from securities purchased to long-term equity investments or vice versa, when the market value is lower than the carrying amount, a realized loss for market value decline is recognized and the related cost is recorded at market value.

Long-term Bond Investments

Long-term bond investments are recorded at cost and adjusted for amortization of premiums or discounts as the adjustment of interest revenue. Cost of bonds sold is calculated by the specified identification method.

Properties

Properties are stated at cost less accumulated depreciation. Major renewals and betterments are capitalized, while repairs and maintenance are expensed as incurred.

Upon sale or disposal of properties, their cost and related accumulated depreciation are removed from the accounts. Any resulting gain (loss) is credited (charged) to current income.

Under an amendment of the Company Law, starting in 2001, the gain on disposal of properties is no longer required to be transferred to capital surplus. The gain on disposal of properties obtained before this amendment had been transferred to capital surplus at the end of year, net of the applicable income tax. In compliance with related regulations, this capital surplus was reversed to retained earnings before December 31, 2002.

Depreciation is calculated by the straight-line method on the basis of service lives estimated as follows: buildings, 6 to 55 years; computer equipment, 3 to 5 years; transportation equipment, 5 years; and office and other equipment, 5 to 8 years. For assets still in use beyond their original estimated service lives, further depreciation is calculated on the basis of any remaining salvage value and the estimated additional service lives.

Intangible Assets

Intangible assets (included in other assets), comprised of goodwill, are amortized on the straight-line basis over 15 years.

Collaterals Assumed

Collaterals assumed are recorded at cost (included in other assets) and revalued by the lower of cost or net realizable value as of the balance sheet dates.

Derivative Financial Instruments

a. Foreign exchange forward contracts

Foreign-currency assets and liabilities arising from forward exchange contracts, which are mainly for accommodating customers' needs or managing the Bank's currency positions, are recorded at the contracted forward rates. Gains or losses arising from the differences between the contracted forward rates and spot rates on settlement are credited or charged to current income. For contracts outstanding as of the balance sheet dates, the gains or losses arising from the differences between the contracted forward rates and the forward rates available for the remaining maturities of the contracts are credited or charged to current income. Receivables arising from forward exchange contracts are offset against related payables as of the balance sheet dates.

b. Forward rate agreements

Forward rate agreements, which are mainly for accommodating customers' needs or managing the Bank's interest rate positions, are recorded by memorandum entries at the contract dates. Gains or losses arising from the differences between the contracted interest rates and actual interest rates upon settlement or as of the balance sheet dates are credited or charged to current income.

c. Currency swap contracts

Foreign-currency spot-position assets or liabilities arising from currency swap contracts, which are mainly for accommodating customers' needs or managing the Bank's currency positions, are recorded at spot rates when the transactions occur; while corresponding forward-position assets or liabilities are recorded at the contracted forward rates, with receivables netted against the related payables.

The related discount or premium is amortized by the straight-line basis over the contract period.

d. Cross-currency swaps

Cross-currency swap contracts, which are for hedging purposes, are recorded at rates prevailing on the contract dates. The net interest upon each settlement is recorded as an adjustment to interest revenue or expense associated with the item being hedged.

Cross-currency swap contracts, which are for the purposes of accommodating customers' needs or managing the Bank's exposures, are marked to market as of the balance sheet dates.

The interest received or paid at each settlement date or balance sheet date are recognized as interest income or expense, which are credited or charged to current income.

e. Options

Options bought and/or held and options written, which are mainly for accommodating customers' needs or managing the Bank's currency positions, are recorded as assets and liabilities when the transactions occur. These instruments are marked to market as of the balance sheet dates. The carrying amounts of the instruments, which are recovered either as assets or liabilities, are charged to income when they are not exercised. Gains or losses on the exercise of options are also included in current income.

f. Interest rate swaps

Interest rate swaps, which do not involve exchanges of the notional principals, are not recognized as either assets and/or liabilities on the contract dates. The swaps are entered into for accommodating customers' needs or managing the Bank's interest rate positions. The interest received or paid at each settlement date is recognized as interest income or expense. These instruments are marked to market as of the balance sheet dates.

For swaps entered into for hedging purposes, the net interest on each settlement is recorded as an adjustment to interest revenue or expense associated with the item being hedged.

g. Asset swaps

Asset swaps involve exchanging the fixed interest of convertible bonds or fixed rate notes for floating interest. In addition, asset swaps involve exchanging the fixed or floating interest of credit link notes for floating or fixed interest. These transactions are recorded by memorandum entries at the contract dates. Asset swaps are entered into for hedging purposes; they are used to hedge interest rate exposure in convertible bonds, fixed rate notes and credit link notes denominated in foreign currency. Net interest on each settlement or balance sheet date is recorded as an adjustment to interest revenue or expense associated with the bonds or notes being hedged.

h. Futures

Margin deposits paid by the Bank for interest rate futures contracts entered into for trading or hedging purpose are recognized as assets. Gains or losses resulting from marking to market and from the settlement of the interest rate futures contracts are classified as hedging or non-hedging depending on its purposes, and are classified as realized or unrealized gains or losses depending on whether the gains or losses had been realized.

i. Credit default swaps

Credit default swaps involve receiving premium by taking credit risk of denominated entities. Such transactions are recorded by memorandum entries at the contract dates. The premium received by the Bank for a credit default swap contract on each settlement or balance sheet date is recorded as current income.

Recognition of Interest Revenue and Service Fees

Interest revenue on loans is recorded by the accrual method. No interest revenue is recognized in the accompanying financial statements on loans and other credits extended by the Bank that are classified as nonperforming loans. The interest revenue on those loans/credits is recognized upon collection.

Under the MOF regulations, the interest revenue on credits which agreements have been reached to extend their maturities is recognized upon collection.

Service fees are recorded as revenue upon receipt or substantial completion of activities involved in the earnings process.

Pension

Pension expense is determined based on actuarial calculations, except for FENB.

Income Tax

Interperiod income tax allocation is applied, whereby tax effects of deductible temporary differences and unused investment tax credits are recognized as deferred income tax assets, and those of taxable temporary differences are recognized as deferred income tax liabilities. Valuation allowance is provided for deferred income tax assets that are not certain to be realized.

Adjustments of prior years' tax liabilities are included in the current year's tax expense.

Tax credits for acquisitions of equipment or technology, research and development expenditure, personnel training expenditure and acquisitions of equity investments are recognized as reduction of current income tax.

Income taxes (10%) on unappropriated earnings after January 1, 1998 is recorded as income tax in the year when the shareholders resolve the appropriation of earnings.

The accounting method applied by the Bank to linked tax system of income tax filing adopted in 2003 by the Bank, SinoPac Holdings, SinoPac Securities and SinoPac Call Center Co., Ltd. is based on a directive issued by the Accounting Research and Development Foundation.

Contingencies

A loss is recognized when it is probable that an asset has been impaired or a liability has been incurred and the amount of loss can be reasonably estimated. If the amount of the loss cannot be reasonably estimated or the loss is possible and remote, the related information is disclosed in the financial statements.

Foreign-currency Transactions

The Bank records foreign-currency transactions in the respective currencies in which these are denominated. Foreign-currency denominated income and expenses are translated into New Taiwan dollars at month-end rates. Foreign-currency assets and liabilities are translated into New Taiwan dollars at closing rates as of the balance sheet dates. Realized and unrealized foreign exchange gains or losses are credited or charged to current income. Gains or losses resulting from restatement at period-end of foreign-currency denominated long-term equity investments accounted for by the equity method are credited or charged to "cumulative translation adjustment" under stockholders' equity.

Treasury Stock

Capital stock acquired is carried at cost and presented as a deduction from stockholders' equity. The treasury stocks acquired are to be reissued to employees. The reissuance of the treasury stocks are accounted for as follows: (a) reissue price higher than the acquisition cost—the excess is credited to additional paid-in capital on treasury stock; and (b) reissue price less than the acquisition cost—initially charged to additional paid-in capital on treasury stock with any remaining deficiency charged to retained earnings.

Reclassifications

Certain 2002 accounts have been reclassified to conform to the 2003 consolidated financial statements presentation.

On May 9, 2002, the Bank, NSC and SPS had established SPH through shares swap. Therefore, shares of SPS held by the Bank were converted to the shares of SPH, and the Bank reclassified these shares (their market value exceeded carrying amount) from long-term equity investments to securities purchased based on its intention for holding.

As of December 31, 2003 and 2002, the Bank held SPH 216,542,894 shares, both with carrying amount at \$2,896,922 and market value at \$3,945,412 and \$3,040,262, respectively, based on the daily average closing prices in December 2003 and 2002.

To deal with SPH's shares held by the Bank, the board of directors (hereinafter "the Board") of SPH resolved to sell two-thirds with a total of 144,361,929 shares on the securities exchange market as of October 22, 2003.

Moreover, in order to inspire the employees, the Board also decided the transferring method for the remaining one-third of shares held by the Bank to employees. Related terms and conditions of the share transferring method are as follows:

a. Type of shares transferred:

One-third of SPH's common shares held by the Bank with a total of 72,180,965 shares.

b. Terms of transferring:

The shares should be transferred once or several times prior to April 21, 2004 upon the authorization of SPH's chairman.

c. Qualification of transferee:

The general principle for qualification of the transferee is set by presidents of SPH, the Bank and SinoPac Securities, respectively. The chairman of SPH and the Board of the Bank and SinoPac Securities are authorized to ratify the principle. Nevertheless, the definition of employees includes the full-time employees of SPH and its subsidiaries.

d. Standards and procedures of transferring:

- 1) The proportion of transferable shares to employees of SPH, the Bank and SinoPac Securities is 1:3:2.
- 2) For those qualified employees, the shares granted will be based on considerations of the individual's grade, performance, special contribution, etc.
- 3) The president of SPH is authorized to determine the term of payment, the contents of rights, and the restricted conditions.
- 4) The chairman of SPH and the Board of the Bank and SinoPac Securities are authorized to ratify the resolution of the remaining unsubscribed shares.
- 5) Registration of transferring shares will be processed after calculating the actual shares subscribed.

e. Transferring price:

The transferring price of each share is NT\$17.9, which was based on the market closing price of SPH's common shares on October 22, 2003, when the share transferring method was passed by the Board.

f. Rights and obligations after transferring:

Registered transferring shares will bear the same rights and obligations as SPH's common shares, except for the prescriptions otherwise stated.

The aforesaid percentages of shares, two-thirds traded on the securities exchange market and one-third transferred to employees, are still remained to be resolved by the Board of the Bank.

Unearned loan fees are those pertaining to nonrefundable loan fees and certain direct costs associated with originating and acquiring loans. The fees collected are not recognized at the time of origination but are deferred and amortized using the effective interest method over the life of the loan as an adjustment of the yield on the related loan.

As of December 31, 2003 and 2002, the balances of non-accrual loans were \$3,235,343 and \$3,709,926, respectively. The unrecognized interest revenue on non-accrual loans amounted to \$145,854 and \$187,803 for the years ended December 31, 2003 and 2002, respectively.

For the years ended December 31, 2003 and 2002, the Bank had not written off credits for which legal proceedings had not been initiated.

The details and changes in allowance for credit losses of loans, discounts and bills purchased for the years ended December 31, 2003 and 2002, respectively, were summarized below:

15. STOCKHOLDERS' EQUITY

a. Capital surplus

Under the Company Law, the component of capital surplus arising from issuance of shares in excess of par value and donation can, except in the year it arises, be transferred to common stock, if approved by stockholders.

This distribution can be made only within specified limits. These restrictions are in accordance with regulations issued by Securities and Futures Commission (the SFC).

Capital surplus arising from equity-accounted long-term equity investment cannot be distributed for any purpose.

b. Retained earnings and dividend policy

The Bank's Articles of Incorporation provide that the Bank may declare dividends or make other distributions from earnings after it has:

- 1) Deducted any deficit of prior years;
- 2) Paid all outstanding taxes;
- 3) Set aside 30% of such earnings as legal reserve;
- 4) Set aside any special reserve or retained earnings allocated at its option
- 5) Allocated at least 1% of the remaining earnings as employee bonus.

To comply with the Bank's globalization strategy, strengthen its market position, integrate its diversified business operation and be a major local bank, the Bank has adopted the "Balanced Dividend Policy". Under this policy, dividends available for distribution are determined by referring to its capital adequacy ratio (CAR). Cash dividends may be declared if the Bank's CAR is above 12% and stock dividends may be declared if the CAR is equal to or less than 12%. However, the Bank may make a discretionary cash distribution even if the CAR is below 12%, if approved at the stockholders' meeting, for the purpose of maintaining the cash dividends at a certain level in any given year.

Cash dividends and cash bonus are paid when approved by the stockholders, while the distribution of stock dividends requires the additional approval of the authorities.

Under the Company Law, the appropriation for legal reserve is made until the reserve equals the aggregate par value of the outstanding capital stock of the Bank. This reserve is only used to offset a deficit, or, when its balance reaches 50% of aggregate par value of the outstanding capital stock of the Bank, up to 50% thereof can be distributed as stock dividends. In addition, the Banking Law provides that, before the balance of the reserve reaches the aggregate par value of the outstanding capital stock, annual cash dividends, remuneration to directors and supervisors and bonus to employees should not exceed 15% of aggregate par value of the outstanding capital stock of the Bank.

Under the Financial Holding Company Act, the board of directors is entitled to execute the authority of stockholders' meeting, which is under no jurisdiction of the related regulations in the Company Law.

On March 21, 2003 and May 9, 2002, the board of directors resolved the appropriation of 2002 and 2001 earnings, respectively, as follows:

	<u>2002</u>	<u>2001</u>
Legal reserve	\$ 673,870	\$ 456,031
Remuneration to directors and supervisors	38,000	21,423
Bonus to employees—cash	15,724	139,251
Cash dividends—NT\$0.781 per share for 2002 and NT\$0.4782 per share for 2001	<u>1,518,639</u>	<u>910,489</u>
	<u>\$2,246,233</u>	<u>\$1,527,194</u>

The appropriation of 2003 earnings has not yet been resolved by the board of directors by January 29, 2004 on which the date of auditors' report. The related information regarding the proposed and resolved earnings appropriation can be referred from the SEC Market Observation Post System (M.O.P.S.) website.

In addition, had aforementioned remuneration to directors and supervisors and bonus to employees (included in the appropriation of 2002 and 2001 earnings) been recognized as expenses, the basic EPS (after tax) for 2002 would have been decreased from NT\$1.18 to NT\$1.16 per share, and the basic EPS (after tax) for 2001 would have been decreased from NT\$0.81 to NT\$0.75 per share.

21. INCOME TAX

Under a directive issued by MOF, a financial holding company and its domestic subsidiaries that held over 90% of shares issued by the financial holding company for 12 months within the same tax year may choose to adopt the linked tax system for income tax filings. SinoPac Holdings intended to adopt the linked tax system for income tax filings with its qualified subsidiaries, including the Bank, SinoPac Securities and SinoPac Call Center Co., Ltd. in 2003.

The principle adopted by the Bank, SinoPac Holdings, SinoPac Securities and SinoPac Call Center Co., Ltd. (collectively, the "Group") for the allocation of linked tax system is to reduce the income tax liabilities of the Group to maximize the synergy of the Group. However, as of December 31, 2003, the Bank has not reached an agreement with all involved companies on the details of the adoption of the linked tax system.

- a. The components of income tax were as follows:

	For the Years Ended December 31	
	<u>2003</u>	<u>2002</u>
Current income tax payable	\$ 282,112	\$ 411,820
Separation taxes on short-term bills interest revenue	275,118	242,697
Foreign income taxes over limitation	-	27,863
Change in deferred income taxes	130,197	43,184
Prior year's adjustment	12,861	(9,620)
Effects upon linked tax system	(175,060)	-
Tax on unappropriated earnings (10%)	<u>-</u>	<u>65,876</u>
Income tax	<u>\$ 525,228</u>	<u>\$ 781,820</u>

Income tax was based on taxable income from all sources. Foreign income taxes paid can be used as credits against the domestic income tax obligations to the extent of domestic income tax applicable to the foreign-source income.

- b. Reconciliations of tax on pretax income at statutory rate and current income tax payable are as follows:

	For the Years Ended December 31	
	<u>2003</u>	<u>2002</u>
Tax on pretax income at statutory rate	\$ 1,043,456	\$ 963,936

- d. The receivable resulting from the adoption of linked tax system was as follows:

	<u>December 31,</u> <u>2003</u>
Receivable from related party—SinoPac Securities	<u>\$ 175,060</u>

- e. The related information under the Integrated Income Tax System was as follows:

	<u>December 31</u>	
	<u>2003</u>	<u>2002</u>
Balances of imputed tax credit account	<u>\$ 411,060</u>	<u>\$ 191,766</u>

The projected creditable tax ratio for earnings in 2003 is 15.52%, which is based on the estimated balance of Imputation Credit Account on the dividend distribution date. The actual imputed tax ratio for earnings in 2002 was 9.60%.

The tax credits allocable to shareholders are based on the balance of Imputation Credit Account on the dividend distribution date. Thus, the 2003 projected creditable tax ratio may vary from the actual ratio.

- f. Tax payable as of December 31, 2003 and 2002 which included in other payable account were after deducting prepaid tax \$332,984 and \$462,118, respectively. Income tax returns through 2001, except those for 1996 and 2001, had been examined by the tax authorities. On the income tax returns for 1994, 1995 and 1997 to 2000, the tax authorities denied the creditability of 10% withholding tax on interest income on bonds totaling \$73,952, which pertained to the period those bonds were held by other investors. The Bank had appealed the decision of the tax authorities.

A reinvestigation was made, resulting in the rescinding of a decision on the tax return for 1994, 1995 and 1997. Income tax returns for 1996 and 2001 reflected reduction in income tax obligations were reduced to \$37,257 attributable to similar type of withholding taxes; which returns were not yet examined by the tax authorities. However, the Bank had accrued liabilities and written-off any assets recognized related to the foregoing withholding taxes totaling \$111,209 as a part of income tax expenses.

- 9) Professional advisory charges

The Bank had entered into several professional advisory contracts with its investees. The professional advisory charges paid for the years ended December 31, 2003 and 2002 amounted to \$114,607 and \$97,173, respectively.

- 10) Due from affiliates

On May 1, 2000, the Bank had transferred its credit card business to AnShin Card Services for a total consideration of \$3,823,798, which had been received as of December 31, 2001.

The compensation received by the Bank for its credit card accounts and the personnel of its credit card business was recognized as income over 5 years in the case of the credit card accounts and over 3 years in the case of the transfer price for the related personnel. The related income recognized from this transaction amounted to \$91,988 for the year ended December 31, 2002.

In December 2002, the Bank had sold its shares of AnShin Card Services to SPH for a total consideration of \$181,238, which had been received before December 31, 2002. The related deferred income had been also written off fully upon shares transferring.

As of December 31, 2003 and 2002, the Bank's receivable to AnShin Card Services amounted to \$25,686 and \$18,579, respectively.

As of December 31, 2003, the Bank's estimated receivable to SinoPac Securities resulting from the adoption of the linked tax system for 2003 tax filing amounted to \$175,060.

11) Asset transactions

In January 2003, the Bank sold its shares in SPLIA and SPPIA to SPH for considerations of \$79,452 and \$3,801, respectively, which had been received before December 31, 2003.

For transactions between the Bank and related parties, the terms are similar to those transacted with unrelated parties except for the preferential interest rates offered to employees for savings up to prescribed limits.

Under the Banking Law, except for government and consumer loans, credits extended by the Bank to any related party should be fully secured, and the credit terms for related parties should be similar to those for unrelated parties.

24. SIGNIFICANT CONTINGENCIES AND COMMITMENTS

In addition to those disclosed in Note 28, financial instruments, significant contingencies and commitments of the Bank, are summarized as follows:

a. Lease contract

The Bank leased certain office premises under several contracts for various periods ranging from 1 to 7 years, with rentals paid monthly, quarterly or semiannually. Rentals for the next 5 years are as follows:

<u>Year</u>	<u>Amount</u>
2004	\$315,514
2005	224,323
2006	195,937
2007	155,026
2008	103,623

Rentals for the years beyond 2008 amounting to \$113,747, the present value of which is about \$104,832 as discounted at the Bank's one-year time deposit rate from 1.35% to 1.70% on January 1, 2004.

b. Land and buildings purchase contract

In January 2001, the Bank had entered into contracts to buy land and buildings located in Taipei for business purposes. The purchase cost was \$199,900, of which \$198,830 had already been paid as of December 31, 2003.

c. Equipment purchase contract

The Bank had entered into contracts to buy computer hardware and software for \$112,093, of which \$75,179 had already been paid as of December 31, 2003.

d. Interior decoration contract

The Bank had entered into contracts to do interior decoration of its premises for \$12,500, of which \$11,250 had already been paid as of December 31, 2003.

25. CAPITAL ADEQUACY RATIO

The Banking Law and Regulations Governing Capital Adequacy of Banking Enterprises require the Bank to maintain a capital adequacy ratio of at least 8%. Pursuant to such law and regulations, if the Bank's capital adequacy ratio falls below 8%, the MOF may impose certain restrictions on level of cash dividends that the Bank can declare or, in certain conditions, totally prohibit the Bank from declaring cash dividends.

As of December 31, 2003 and 2002, the Bank's standalone capital adequacy ratios were 12.39% and 12.85%, respectively, and the consolidated capital adequacy ratios were 10.50% and 10.76%, respectively.

26. AVERAGE AMOUNT AND AVERAGE INTEREST RATE OF INTEREST-EARNING ASSETS AND INTEREST-BEARING LIABILITIES

28. FINANCIAL INSTRUMENTS

a. Derivative financial instruments

The Bank engages in derivative transactions mainly for accommodating customers' needs and managing its exposure positions. It also enters into cross-currency swaps, interest rate swaps, futures and asset swaps to hedge the effects of foreign exchange or interest rate fluctuations on its foreign-currency net assets. The Bank's strategy is to hedge most of the market risk exposures using hedging instruments with market value changes that have a highly negative correlation with the changes in the market of the exposures being hedged. The Bank also reassesses the hedge effectiveness of the instruments periodically.

The Bank is exposed to credit risk in the event of default on contracts by counter-parties. The Bank enters into contracts with customers that have satisfied the credit approval process and have provided the necessary collateral. The transactions are then made within each customer's credit limit, and guarantee deposits may be required, depending on the customer's credit standing. Transactions with other banks are made within the trading limit set for each bank on the basis of the bank's credit rating and its worldwide ranking. The associated credit risk has been considered in the evaluation of provision for credit losses.

The contract amounts (or notional amounts), credit risks and fair values of outstanding contracts were as follows:

The fair value of each contract is determined using the quotation from Reuters or Telerate Information System. The fair value of each futures contract refers to the closing price published by LIFFE as of the balance sheet dates.

As of December 31, 2003 and 2002, the Bank entered into asset swap contracts for hedging purposes, with notional amounts at \$2,552,493 and \$4,830,283, respectively. Since the Bank entered into these contracts with counter-parties with good splendid worldwide ranking and credit rating, no significant credit risk is expected.

As of December 31, 2003, the Bank entered into credit default swap contracts for the purposes of accommodating customers' needs, with notional amounts at \$384,130. Since the Bank entered into these contracts with counter-parties with good splendid worldwide ranking and credit rating, no significant credit risk is expected.

The notional amounts of derivative contracts are used solely for the purpose of calculating receivables and payables to all counter-parties. Thus, the notional amounts do not represent the actual cash inflows or outflows. The possibility that derivative financial instruments held or issued by the Bank cannot be sold at reasonable prices is remote; thus, no significant cash demand is expected.

The gains and losses on derivative financial instruments from Bank SinoPac for the years ended December 31, 2003 and 2002 were as follows:

Other liabilities	160,605	160,605	104,463	104,463

Methods and assumptions applied in estimating the fair values of nonderivative financial instruments are as follows:

- 1) The carrying amounts of cash, due from banks, due from Central Bank, acceptances, receivables, call loans and due to banks, acceptances payable, remittances and payables approximate their fair values because of the short maturities of these instruments.
- 2) The fair values of securities purchased, long-term equity investments and long-term bond investments are based on their market prices if these market prices are available. Otherwise, fair values are estimated at their carrying amounts.
- 3) Loans, discounts and bills purchased, deposits, bank debentures and funds received for subloans are interest-earning assets and interest-bearing liabilities. Thus, their carrying amounts represent fair values. Fair values of nonperforming loans are based on the carrying amounts, which are net of allowance for credit losses.
- 4) The fair values of government bonds and corporate bonds submitted as refundable guarantee deposits are based on market values while those of certificates of deposits are estimated at their carrying amounts. Fair values of other refundable guarantee deposits and guarantee deposits received are estimated at their carrying amounts since such deposits do not have specific due dates.

Certain financial instruments and all nonfinancial instruments are excluded from disclosure requirement. Accordingly, the aggregate fair values presented above do not necessarily represent the total values of the Bank.

c. Financial instruments with off-balance-sheet credit risks

The Bank had significant credit commitments principally relating to customer financing activities. The terms of most of the credit commitments were under seven years. (For the years ended December 31, 2003 and 2002, the loan interest rates ranged from 0.01% to 20.00%, and from 0.38% to 12.75%, respectively.) The Bank also issued financial guarantees and standby letters of credit to guarantee the performance of a customer obligated to a third party. These guarantees were usually with terms of less than 1 year and with maturity dates not in any particular period.

The contract amounts of financial instruments with off-balance-sheet credit risks as of December 31, 2003 and 2002 were as follows:

	<u>2003</u>	<u>2002</u>
Undrawn loan commitments	\$ 17,504,577	\$ 14,310,438
Financial guarantees and standby letters of credit	13,504,666	10,113,474
Credit card commitments for credit cards	68,296	58,507

Since most of the commitments will expire without being drawn upon, the total commitment amounts do not necessarily represent future cash demands. The Bank's maximum credit risk from these commitments is the total commitment amounts assuming that the customer uses the full amount of the commitment and the related collateral or other security turns out to be worthless.

The Bank makes credit commitments and issues financial guarantees and standby letters of credit only after evaluation of customers' credit standings. Based on the result of the credit evaluation, the Bank may require collateral before draw down against the credit facilities. As of December 31, 2003 and 2002, ratios of secured loans to total loans were 77% and 79%, respectively. Collaterals held vary but may include cash, inventories, marketable securities, and other properties. When the customers default, the Bank will, as required by circumstances, foreclose the collaterals or execute other rights arising out of the guarantees given.

The commitment of credit cards don't require collateral, but need to evaluate credibility for period. In case, it is necessary to modify credit amount.

29. INFORMATION ON CONCENTRATIONS OF RISK

The Bank has no concentrated credit risk in any industry, individual counter-party or group who engaged in similar business activities. Industries with 5% or more of the outstanding loans as of December 31, 2003 and 2002 were as follows:

	<u>December 31</u>
